FORENSICS REPORT

The technology for customizable automated report creation and case management

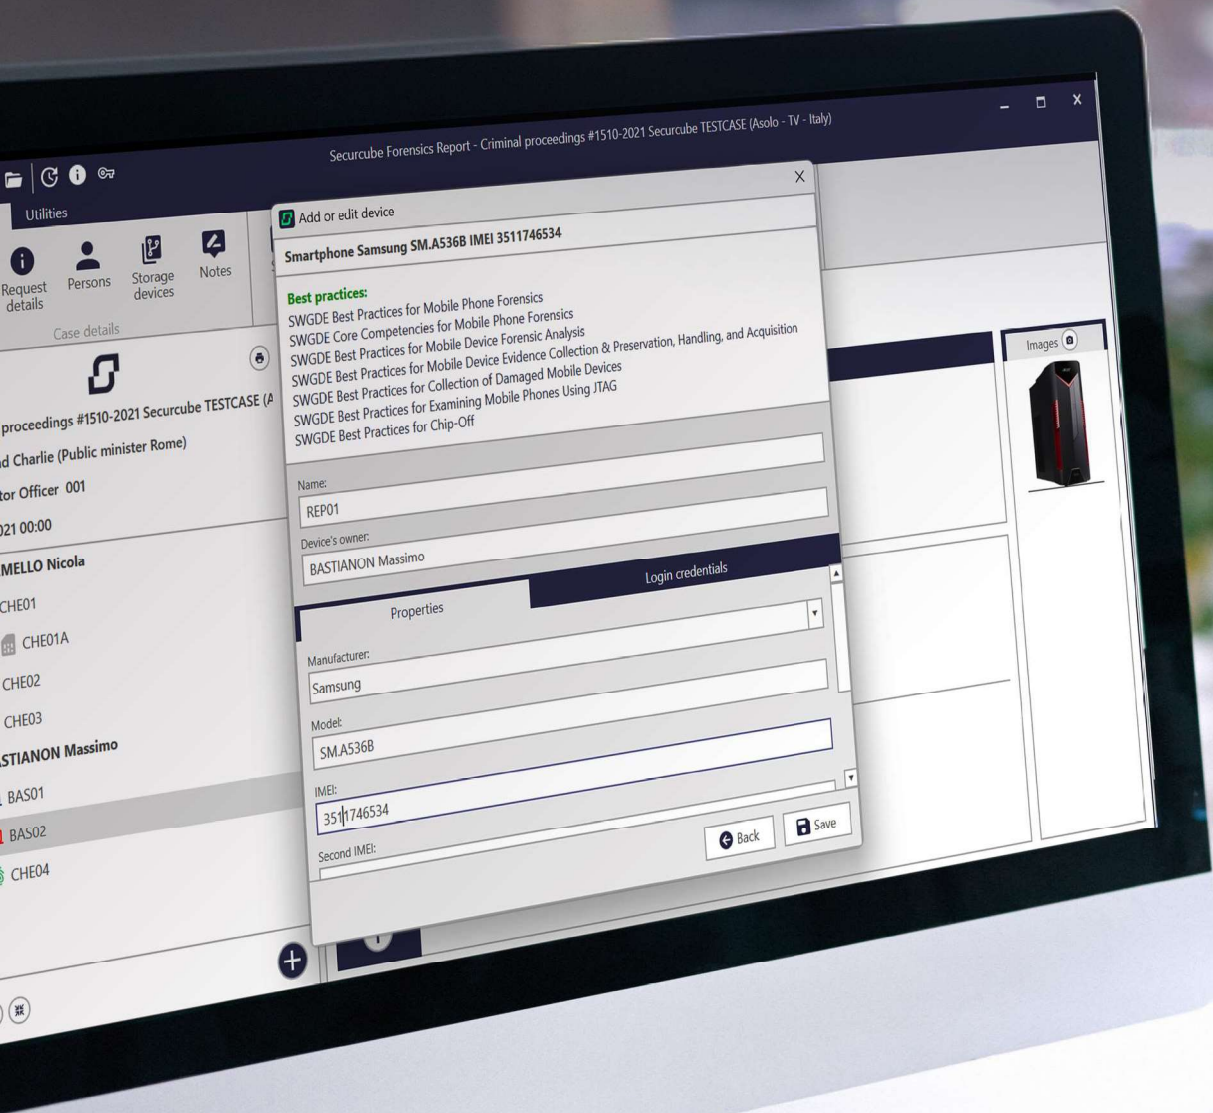

Forensic experts begin investigations upon case assignment, proceeding through evidence collection, analysis, and report generation using specific technologies. We aim to streamline the process, reducing report filing time and ensuring professional, error-free court presentations.

Our Forensics Report technology simplifies this by efficiently compiling all necessary details, including chain of custody, evidence descriptions, analysis statements, and conclusions, into a comprehensive report.

Securcube Forensics Report complies with NIST and SWGDE guidelines.
