INDICO
THE EVIDENCE COMPANY

2022-05

Indico

/in'di.ko/ noun

Meaning: evidence; clues.

When COVID-19 struck, we at Indico spent our time to revitalize and reinvent the company. With new strategies we seek to become *“The Evidence Company”* where we are committed to improve procedural justice around the world.

Values

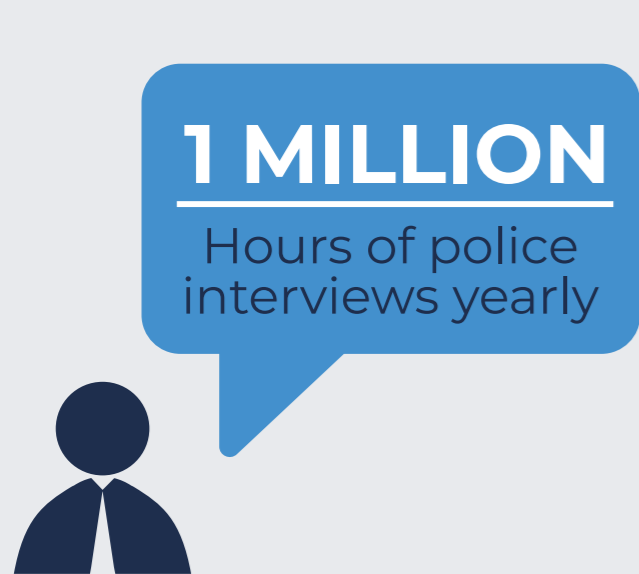

We treat all people with kindness, dignity, and compassion.

We respect and protect the rule of law.

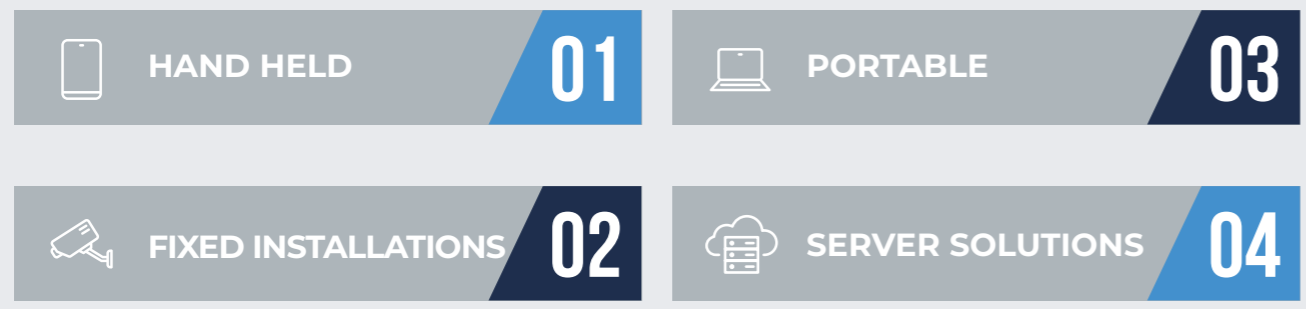

We act in an open and transparent way.

We strive to create thriving and innovative business alliances with partners and customers.

USE OF **DEVICES** IN OUR PRODUCT RANGE

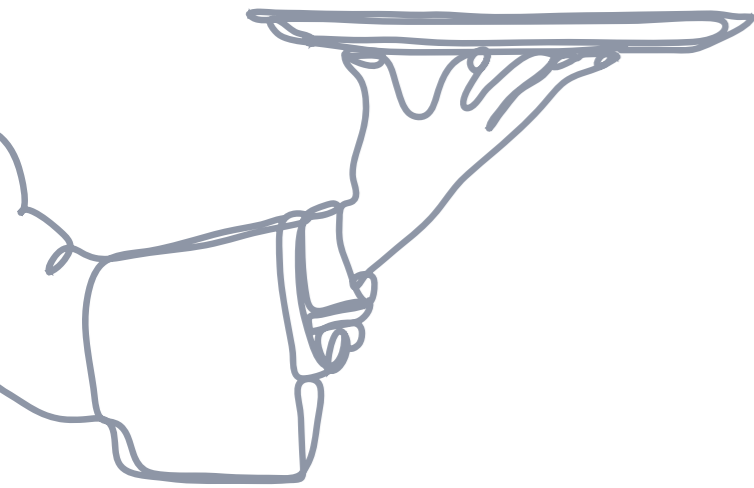

Our story

With the Norwegian Police's efforts to reform the interview room in the late 1990s, it was clear that under their scientifically based guiding principle, non-coercive interviewing technique was far more accurate in deriving the actual truth.

Also proven scientifically, the Norwegian Police partnered with the yet established team behind Indico to create an interview recording solution that recording evidence, capable of withstanding the scrutiny in court.

Indico deployed their first interview solution to the Norwegian Police in 2003 and the rest is history. Today, a large number of European Police Forces regard Indico as their trusted partner to implement and uphold their investigative interviewing methods. The Norwegian Police are still amongst these forces.
