The New Slider Solution

 **VIDISCO**

The New Vidisco Slider!

As the company who developed the first Slider, we are proud to present the new and improved Slider solution for obtaining a large imaging area at a click of a button. Vidisco's Slider is a compact lightweight solution designed to integrate with Vidisco's imagers. The Slider enables a modular image acquisition between one to sixteen images!

According to the inspected object size, you can choose your region of interest and decide the amount of images to take. The new Slider has the unique ability to operate as "stand-alone" in a full wireless configuration and battery operation.
