Securcube

Assisting investigators in providing answers that are understandable to all and ready for the courtroom.

We are a team of **digital forensic experts and IT developers** focused on justice technology.

We specialize in **developing user-friendly, cutting-edge tools for analyzing phone and cell tower data** among multi-source digital evidence.

This correlative integration ensures comprehensive validation.

Our approach combines **traditional methods with innovative tools**, offering the most comprehensive understanding of digital evidence to deliver clear results into the courtroom.

DECODING EVIDENCE, DEFINING JUSTICE.

COLLECT, ORGANIZE,
METICULOUSLY ANALYZE,
VALIDATE, AND PRESENT
YOUR EVIDENCE WITH
REAL CONFIDENCE.

OUR SERVICES

SECURCUBE DIGITAL FORENSIC LAB, YEARS OF PROFESSIONAL EXPERIENCE AND TECHNOLOGY

DATA RECOVERY AND EXAMINATION

- Cellebrite, MSAB XRY, EnCE, Oxygen internationally certified engineers.
- The latest technology for optimal in-lab mobile extractions.
- Professional and reliable recovery for site and data protection.
- Advanced on demand multi-source digital evidence analysis beyond just correlation with mobile extractions, phone records (CDR), cell tower traffic and surveys, IP and metadata records, financial records, CCTV feed, GPS, among others.

DEDICATED EVIDENCE MANAGEMENT

- Complete digital evidence extraction and analysis case filing and support.
- Guided procedures to review and present all resources before trial.
- Courtroom presentations, consultancy and technical depositions.

NOT JUST A LAB:

Our experience will give you an in depth and qualified outlook on how to collect, analyze and present digital evidence.

Clear answers. Strong evidence. Professional. Secure.

CELL SITE FIELD TESTS AND FORENSIC ACTIVITY

- Precise surveys of cell towers real coverage.
- Backup for law enforcement: Criminal evidence seizures according to best practices.
- LAB evidence research: PCs, GPS devices, smartphones, cameras, SIM cards, etc.
- Reports, assistance and technical documentation.

ACADEMIC SPECIALTY

- We provide full comprehensive training for our customers ensuring a thorough use of the solutions.
- Our academic programs bring cutting-edge technology and awareness of modern investigation techniques to universities around the world to prepare the future investigation leaders.
- Certifying Cell Site Analysts and CDR analysis examiners expands the abilities needed for today's digital forensic science.
- Our Training for Trainers program brings our partners to the next level by transmitting knowledge to their own customers.
- Staying on top of today's needs, we have a full range of online on-demand courses.
- Partnering with world class academies like NW3C, our courses are attended by Law Enforcement members around the world.

OUR PRODUCTS

A forensic system designed to explore more: complete knowledge, innovative functions, intelligent management, world-class mapping and beyond.

Each tool reveals a piece of evidence to reconstruct the puzzle of the crime.

Our solutions are born from our own experience and research in the field of digital forensics.

We are people who have been on the field, in the lab and in front of a courtroom.

Every function and breakthrough was created from real case scenarios and collaborations with Law Enforcement on a global scale.

When investigators hold the power of working with dedicated and efficient tools, they are successful.

Internationally trusted background and professionalism.

PHONELOG

THE SOLUTION FOR PHONE RECORD AND MULTI-SOURCE DIGITAL EVIDENCE ANALYSIS AND ADVANCED CORRELATION.

SUCCESS CASES:

- Discover a stalker in seconds.
- Understand the behavior of any suspect.
- Find correlations among robberies or fires.
- Instantly detect connections between criminal organizations.

MAIN FEATURES:

- AI powered customized search among all data within a case.
- Graphic at-a-glance discovery of common contacts within users or groups.
- Event match & display of memory extraction from devices.
- Fully customizable smart mind map of the case.
- 3D multi-entity movements animation with meeting points detection.
- Valuable identity and tracing information.
- Automated data protection and validation.
- Explore CCTV footage, license plates, invoices, multimedia chat timelines, IP/Metadata statistics, entities lists and more using Phonelog's intuitive interface.

BTS TRACKER

THE PORTABLE DEVICE TO SCAN, MAP AND UNDERSTAND REAL CELL TOWER COVERAGE, BLUETOOTH AND WIFI SIGNALS WITHIN ANY ENVIRONMENT IN ORDER TO FORENSICALLY LOCATE DEVICES WITHIN A SPECIFIC AREA.

SUCCESS CASES:

- Unveil the truthfulness of an alibi.
- Validate the missing person's last location.
- Pinpoint suspects when no evidence is available.
- Narrow possible location of a suspect/victim to a room inside a building with WiFi/Bluetooth signals.

MAIN FEATURES:

- Get IDs of any cell tower from 2G to 5G technologies, any carrier.
- Wi-Fi and Bluetooth signal survey for precise location.
- Accurate radio sensitivity for band, frequency, carrier, power and channel details.
- Integrated GPS for survey path location.
- Map out the analyzed area from your device.
- Cell towers updated and historical coverage database for phone record and GPS correlation on a 3D map.

FORENSICS REPORT

THE FULLY CUSTOMIZABLE CASE MANAGEMENT SOLUTION TO GENERATE QUICK, WELL WRITTEN, BEST-PRACTICE COMPLIANT AND COURT-READY FINAL FULL-CASE FORENSIC REPORTS.

SUCCESS CASES:

- Case management optimization in terms of time, effort and efficiency.
- Enhanced reputation due to compliance with SWGDE international standards.
- Examiner's proficiency bringing reliability at the courtroom.

MAIN FEATURES:

- Cases details and history at a glance.
- Customizable templates, evidence types and analysis tools to adapt the contents.
- Create checklists and tasks to complete and unify investigation activities among multiple users.
- Warnings and alerts keeping you safe from skipping tasks, missing information and for saving your work.
- Drag-and-drop automatic file recognition with built-in document protection.
- "Life-saving" customizable tags for all your evidence regardless being physical or digital.
